

## **Brazil Focused Gold Producers**

Corporate Presentation - January 2024

PGDM
4,500 TPD Gold Plant
3 x UG mines
1 x Open Pit PreDevelopment Projects
1 x High Grade
Exploration Project

# Pilar Gold - Key Metrics

4.07M

Oz Gold Resource

~45,000

Oz Annual Gold Production

125,000

Oz Medium Term Growth Potential

1

Gold Plants with Associated Infrastructure

5

Developed UG Mines & Open Pit Projects

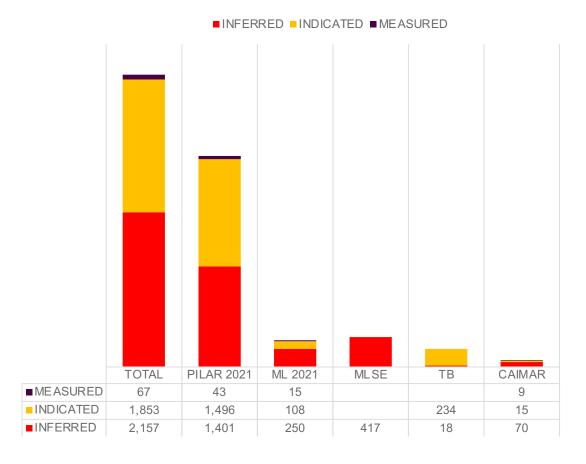

36g/t

Avg. Grade of our Exploration Drill Program

## PGDM – 4.07M oz Gold Resource with Further Upside

#### PILAR GOLD CERTIFIED 4.07 MOZ RESOURCE

- Sizeable resources base of > 4.07M oz contained gold
- Attractive long-term exploration potential yet to be unlocked
- Updated NI43-101 report is in final draft form
- 8,000 metres of drilling completed since acquisition
- 30,000 metres planned for 2022 at Pilar, Mlz, Sertao, Cascavel and Livramento

#### Notes

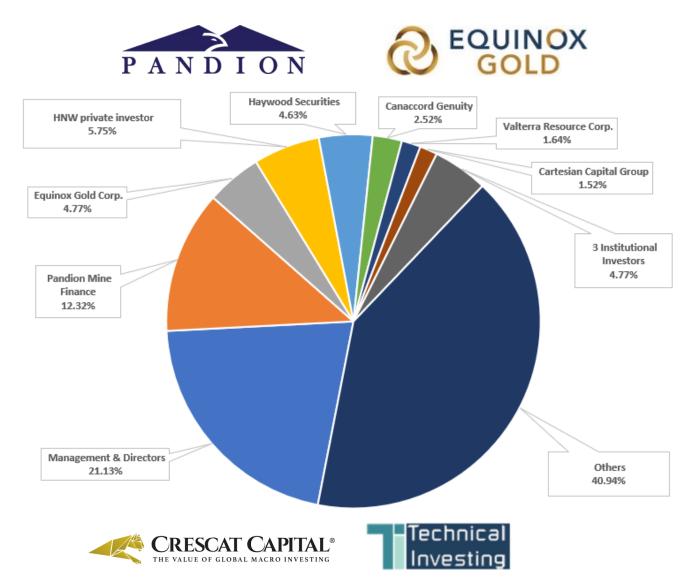

Pilar and ML: As 26th May 2021 preliminary Pilar Gold Inc Resources NI43101 Report.

MLSE, TB Resources: As 30 June 2020 Exclusive Mineral Resources (informal) + Depleted Reserves as 30 June 2021 (informal)

\*\*CAIAMAR Resources: As December 31, 2015. Brio Gold Inc Mineral Resources are exclusive of Mineral Reserves.

## **Strong Supportive Shareholders**

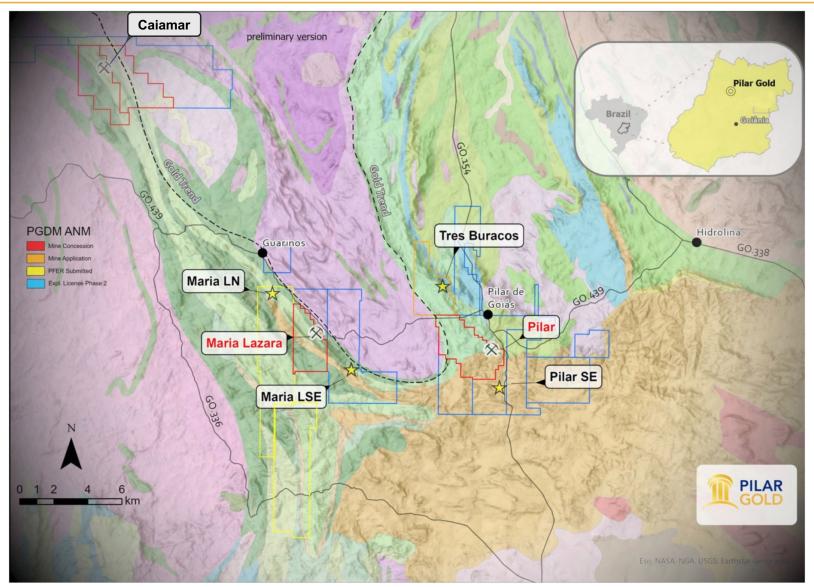

# **Pilar Gold Inc Capital Structure**

Capital Structure as at January 2024 (Canadian dollars)	
Shares Outstanding	246,725,782
Warrants at \$1.00 (December 2024) Warrants at \$1.50 (June 2025) Stock Options at \$0.25 (August 2026) Stock Options at \$0.70 (June 2027)	5,553,908 10,000,000 9,700,000 11,000,000
Total Shares on Issue	246,725,782
Fully Diluted Shares, Options and Warrants	282,979,690

## **PGDM Map**

# **PGDM Assets**

#### **PGDM Gold Plant**

- Modern 4,500 TPD plant with associated infrastructure
- Recoveries of ~92% gold through CIL circuit

### Pilar Mine 1+2

- Long life UG mine
- Located right next to PGDM plant
- Currently producing

### Maria Lázara

- UG mine reopened in 2021
- ~12km from PGDM plant
- Currently producing

### Caiamar

- Developed UG mine
- Grades expected up to 3.5g/t Au
- Planned start 2024

### **Três Buracos**

- Large open pit predevelopment project
- Low cost, high volume, low grade
- Planned start 2024

## Pilar Mine – A Big Long Life Mine

- Underground development at record pace of 600+ meters per month
- Increased Resource from 2.2moz to 2.9moz
- Average ore production over 3,000 tpd
- 2021 drilling in HG2 zone suggests higher than expected grades
- Pilar deposits cover two adjacent structural domains mainly made of gneissic rocks covered by schists
- The gold mineralization has a strike length of 3.3km, a width of 2.6km, and a thickness between 10m and 30m
- Extending life of mine by aggressive development drilling

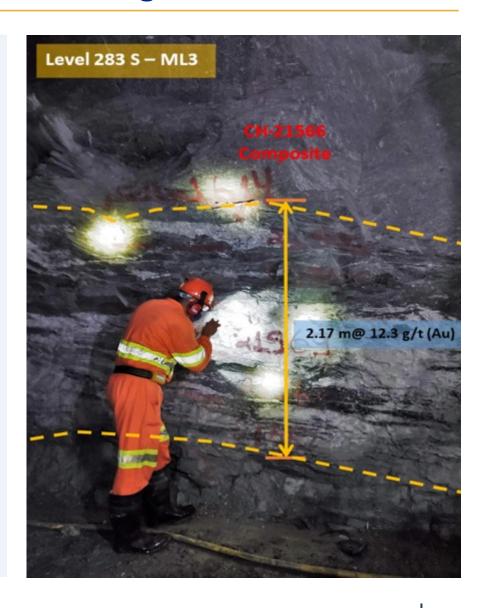

## Maria Lázara Mine – Sizeable High-Grade Potential

- MLZ restarted in 2021 with aggressive development currently underway expected to lead to increased tonnage and grades
- New higher-grade sources to be developed including:
  - MLZ Main: two main levels currently producing projected to continue for at least 3 years (c. 550 kt total production over LOM at an avg. grade of 1.60 g/t)
  - MLZ SE: two main sectors, expected to start producing by 2023 (c. 3.2 Mt total production over LOM at an avg. grade of 2.06 g/t)

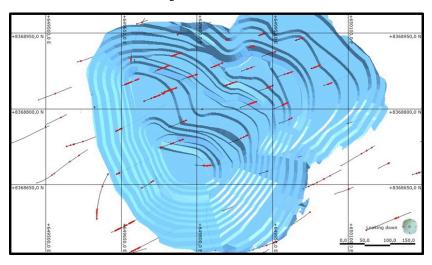

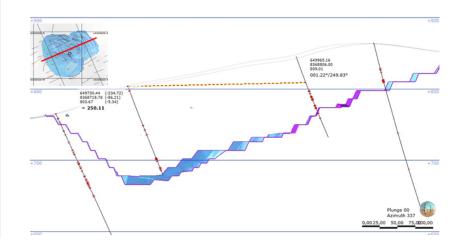

## **Três Buracos – Development Plans Underway**

### Key deposit characteristics

- Open-pit ~6km from PGDM plant
- Lower-grade and lower cost
- Gold mineralized strike length of ~
   1.7km, width ~ 1.0km, and
   thickness between 25m and 60m
- Outcrop extension of Pilar underground mine
- Includes high-grade mineralization that occurs in highly silicified and sulphidized ore
- Feasibility studies and permitting under-way

### Pit Shell Shape

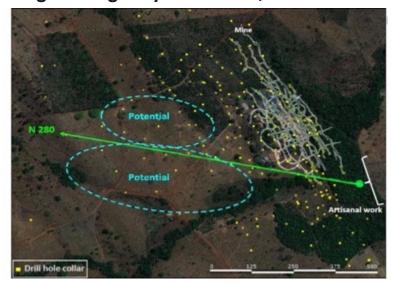

## Caiamar – Potential 14,000 oz Au / year

Caiamar was put on care and maintenance in 2015 during weak gold price of < 4,000 BRL\$/oz

- Higher grade, open potential
- Yamana feasibility study from 2013 had identified 230k oz @ 3.3 g/t and reserves of 75k oz @ 3g/t Au
- Caiamar produced approx. 28k oz between 2013-2015
- The mine is currently being dewatered

## **Confidentiality & Disclaimer**

#### Confidential Information

This presentation includes certain non-public Information of Pilar Gold that is being provided to the receiving party in connection with the receiving party's evaluation of a potential transaction relating to Pilar Gold's Pilar gold mining operations in Brazil ("Transaction"). The Information is confidential and is subject to the terms of the Confidentiality Agreement between Pilar Gold and the receiving party.

#### No Representations

The presentation has been prepared to assist the receiving party in making their own evaluation of potential Transaction. Neither Pilar Gold nor any of its affiliates or their respective representatives makes any representation or warranty as to the accuracy or completeness of the presentation.

#### **Forward-looking Statements**

This presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information. Forwardlooking statements and forward-looking information included or incorporated by reference in this presentation relate to, among other things: the duration, extent and other implications of the novel corona virus (COVID-19) and any related restrictions and suspensions with respect to our operations, the strategic vision for the Company and expectations regarding expanding production capabilities and future financial or operational performance, including the conceptual life of mine plan for Pilar, Pilar Gold's production and cost guidance; and conversion of Mineral Resources to Mineral Reserves. Forward-looking statements or information generally identified by the use of the words "believe", "will", "advancing", "strategy", "plans", "budget", "anticipated", "expected", "estimated", "target", "objective" and similar expressions and phrases or statements that certain actions, events or results "may", "could", "should", "will be taken" or "be achieved", or the negative connotation of such terms, are intended to identify forward-looking statements and information. Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, undue reliance should not be placed on forward-looking statements since the Company can give no assurance that such expectations will prove to be correct. The Company has based these forward-looking statements and information on the Company's current expectations and projections about future events and these assumptions include: tonnage of ore to be mined and processed; ore grades and recoveries; prices for gold remaining as estimated; currency exchange rates remaining as estimated; availability of funds for the Company's projects and future cash requirements; capital, decommissioning and reclamation estimates; the Company's Mineral Reserve and Resource estimates and the assumptions on which they are based; prices for energy inputs, labour, materials, supplies and services; no labour-related disruptions and no unplanned delays or interruptions in scheduled development and production; all necessary permits, licenses and regulatory approvals are received in a timely manner; and the Company's ability to comply with environmental, health and safety laws. The Company's previously announced guidance is included in this presentation and does not account for any possible adverse effects of COVID-19 to the Company's business and results of operations. While the Company considers these assumptions to be reasonable based on information currently available, they may prove to be incorrect. Accordingly, readers are cautioned not to put undue reliance on the forwardlooking statements or information contained in this presentation. The Company cautions that forwardlooking statements and information involve known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements and information contained in this and the Company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in gold prices; fluctuations in prices for energy inputs, labour, materials, supplies and services; fluctuations in currency markets; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); inadequate insurance, or inability to obtain insurance to cover these risks and hazards; employee relations; relationships with, and claims by, local communities and indigenous populations; the Company's ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner or at all; changes in laws, regulations and government practices,

including environmental, export and import laws and regulations; legal restrictions relating to mining including those imposed in connection with COVID-19; risks relating to expropriation; increased competition in the mining industry. Forward-looking statements and information are designed to help readers understand management's views as of that time with respect to future events and speak only as of the date they are made. Except as required by applicable law, the Company assumes no obligation and does not intend to update or to publicly announce the results of any change to any forward-looking statement or information contained or incorporated by reference to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements and information. If the Company updates any one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect to those or other forward-looking statements. All forward-looking statements and information in this presentation are qualified in their entirety by this cautionary statement.

#### **Technical Information**

All technical information related to Pilar Gold's properties and the Company's mineral reserves and resources is available on Pilar Gold's website at www.Pilargold.com.

#### All-in-Sustaining Costs (AISC)

AISC per gold oz sold is a non-IFRS measure based on guidance announced by the World Gold Council ("WGC") in September 2013 and updated in November 2018. The WGC is not a regulatory body and does not have the authority to develop accounting standards or disclosure requirements. The WGC has worked with its member companies to develop a measure that expands on IFRS measures and non-IFRS measures to provide visibility into the economics of a gold mining Company. Current IFRS measures used in the gold industry, such as operating expenses, do not capture all of the expenditures incurred to discover, develop and sustain gold production. The Company believes the AISC measure provides further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Combined AISC does not include corporate G&A.

#### Cautionary Note to U.S. Investors Concerning Estimates of Reserves and Resources

These estimates have been prepared in accordance with the requirements of Canadian securities laws. which differ from the requirements of U.S. securities laws. The terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are defined in NI 43-101 and recognized by Canadian securities laws but are not defined terms under the U.S. Securities and Exchange Commission ("SEC") Guide 7 ("SEC Guide 7") or recognized under U.S. securities laws. U.S. investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be upgraded to mineral reserves. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an "inferred mineral resource" will ever by upgraded to a higher category. Under Canadian securities laws, estimates of "inferred mineral resources" may not form the basis of feasibility or pre-feasibility studies. U.S. investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. In addition, the definitions of "Proven Mineral Reserves" and "Probable Mineral Reserves" under CIM standards differ in certain respects from the standards of the SEC. Accordingly, these mineral reserve and resource estimates and related information may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the U.S. federal securities laws and the rules and regulations thereunder. including SEC Guide 7.

Numbers may not add due to rounding. All dollar amounts in USD unless otherwise noted.
